Editor
Geophysical Journal International

Dear Dr. Gary Egbert,

Please find attached our revised manuscripts entitled “On recovering distributed IP information from inductive source time domain electromagnetic data” for submission to Geophysical Journal International. The reference ID for the manuscript is: ID GJI-S-15-0747. Attached to this letter you will find a detailed response to the comments from yourself as well as Prof. Hordt. We have clarified a major issue on estimating 3D conductivity model, and some minor argues raised from Prof. Hordt in the paper, and now we hope that you and the reviewers are satisfied with our responses.

We look forward to seeing the article published in Geophysical Journal International! Please let us know if you have any further comments on our manuscripts.

Sincerely,
Seogi Kang
