

September 3, 2015  
Editor-in-Chief  
Geophysical Journal International

Dear Dr. Trampert,

Please accept the attached document as our submission for the manuscript titled: “On recovering distributed IP information from inductive source time domain electromagnetic data”. This paper represents our efforts of recognizing, linearizing time domain IP responses from inductive source, and recovering distributed IP information from them.

We feel that Geophysical Journal International is the ideal journal for our manuscript.

Please contact me with any questions or concerns.

Sincerely,  
Seogi Kang

Ph.D student
